Profile

Backend Developer with over 1.5 years of hands-on experience building robust software solutions within the .NET ecosystem. Dedicated to designing scalable RESTful services, optimizing database architectures, and ensuring high code quality through Clean Architecture, SOLID principles, and rigorous unit testing. Beyond my primary tech stack, I possess a versatile technical foundation across multiple programming languages and academic experience in NLP and semantic analysis, backed by a co-authored scientific publication. This blend of practical engineering skills and an analytical, research-oriented mindset enables me to effectively tackle both everyday business requirements and complex algorithmic challenges.

Skills

Programming Languages: C#, Java, C++, Basic Python, JavaScript, TypeScript
Frameworks & Platforms: ASP.NET, Entity Framework, Qt, Node.js, Unity, FoxPro
Frontend Technologies: HTML5, CSS3, Basic React.js, jQuery, Responsive Web Design, Basic Angular
Databases: SQL, Microsoft SQL Server, MySQL, PostgreSQL, LINQ
Software Engineering & Architecture: RESTful Web Services, Clean Architecture, SOLID Principles, Object-Oriented Programming (OOP), Dependency Injection (DI), Design Patterns, AI-assisted Development (Calude, GitHub Copilot etc.)
Testing: Unit Testing(xUnit/NUnit), Mocking Strategies

Education

Software engineering

09/2023-07/2027

Ternopil Ivan Puluj National Technical University • Ternopil, Ukraine
Fourth-year student

Languages

Ukrainian, English Intermediate/Upper-Intermediate

Experience

Memberworks
C# developer
November 2025 - July 2026
Description: at Memberworks, I developed and optimized software solutions for membership and subscription platforms, focusing on improving system performance and enhancing the user experience.

MagView
C# developer
July 2026 - November 2026
Description: at MagView, I contributed to two distinct software projects within the healthcare industry. I successfully balanced dual priorities to deliver tailored technical solutions that streamlined medical workflows and improved overall system efficiency.

Non-commercial projects

Name: Issue-tracking management platform
Company: Eleks
Duration: Jul 2024 - Aug 2024 (2 months)

Name: Platformer "Dimensional Hell"
Company: Brackeys Game Jam 2026
Duration: Feb 2026 (2 week)
